This is a PDF which contains some visuals. Let's pray this works:

These	Are Some	Tabular	Data
34	10	24	19
65	23	16	73
4	50	12	55
23	130	1	15
38	88	44	42
65	89	31	52

As you can see, the tables are simply printed out cell-by-cell, iterating by each entry per row.

Here is an image of a toucan, but it will be ignored:

The toucan was right above this line ^

Here is an image containing some text:

The image containing text was right above this line ^

Again, it is completely ignored! This is working!
